--- average results of peers of the same age and sex

Dominant Physical Skill

- speed
- power
- endurance
- coordination

Tactical skills

- low
- medium
- high

Description of strengths

Strength: ENDURANCE

Endurance is the ability to perform exercises with lower intensity as long as possible, or with maximum intensity for a specific time period. It also includes ability to resist fatigue. Medium level endurance is important for all sports where duration of activity is longer than 3 minutes.

Tactical skills

Good tactical skills are necessary for sport games, where more players are on the field. You need to have good vision, good read of situation and quick decision. Tactical skills are important as well for 1 to 1 sports like tennis where is necessary to analyze position of other player and prepare how and where play to ball
